- A) Besides
B) In spite of
C) Owing to
D) In case of
E) As though

74. Dehydration occurs when you use or lose more fluid than you take in, and your body doesn't have enough water and other fluids to carry out its normal functions. If you don't replace lost fluids, you will get dehydrated. Anyone may become dehydrated, but the condition is especially dangerous for young children and older adults. ---- Older adults, however, naturally have a lower volume of water in their bodies, and may have conditions or take medications that increase the risk of dehydration.
- A) This means that even minor illnesses can result in dehydration in older adults.
- B) Dehydration also can occur in any age group if you don't drink enough water during hot weather.
- C) You can usually reverse mild to moderate dehydration by drinking more fluids.
- D) Dehydration describes a state of negative fluid balance that may be caused by numerous disease entities.
- E) The most common cause of dehydration in young children is severe diarrhea and vomiting.

75. These days are very difficult for Europe's largest minority group, the Roma. Attacks against them are on the rise in many European countries. In the past year, attacks on Roma communities have escalated across Europe, but observers say the situation is most tense in Central and Eastern Europe. Even so, thoughts about these people are varied. ---- Others point out that the Roma are often made into scapegoats during tough economic times. But the majority in these countries want to boot the Roma and all foreigners out of their countries.
- A) The idea is that if they're spread around they're more apt to join mainstream society and less likely to become targets for extremists.
- B) There's just one road in and one road out making it hard for extremists to harass them.
- C) Some Europeans dismiss the Roma as lazy and involved in petty crime.
- D) For their part the Roma say Czech society doesn't give them a chance.
- E) Outside their parents say they don't want to integrate.

76-80: For these questions, choose the irrelevant sentence in the passage.

76. (I) Some disorders of the body are caused not by lifestyle habits or infectious agents but by errors in the body's blueprints—genetic abnormalities. (II) It is estimated that about 5 percent of all children are born with major birth defects. (III) A significant number of the defects are the result of genetic mutations or abnormalities in the structure or number of chromosomes. (IV) During a pregnancy, chromosomal abnormalities can be detected by taking a sample of foetal cells and analysing the chromosomes. (V) For example, about one in every 800 babies born in the United States has Down syndrome, a disorder almost always marked by the presence of an extra number 21-chromosome.

A) I B) II C) III D) IV E) V

77. (I) Two kinds of solutions for the unemployment problem have been attempted. (II) An important cause is the lack of necessary skills or education for available job opportunities. (III) One consists of providing relief or protection from the financial hardships of unemployment. (IV) In earlier periods, such measures consisted largely of local governmental assistance to the needy, together with private charitable aid. (V) The other type of solution for the unemployment problem consists of measures aimed at creating conditions that reduce the level of unemployment.

A) I B) II C) III D) IV E) V

78. (I) During the 19th century of the full impact of the industrial revolution, the changes in transportation, the growth of science and archaeology produced a materialistic philosophy. (II) The romanticists early in the century turned to the past as a vicarious escape from the present. (III) The materialistic philosophy was slightly supported by the first law of thermo-dynamics which states energy can neither be created nor destroyed by any material means. (IV) John Soane copied the columns of the Roman Temple of the Sibyl at Tivoli for the Lothbury angle of the bank of England. (V) Others, like Robert Smirke in the British Museum, turned to Greece for inspiration.

A) I B) II C) III D) IV E) V

79. (I) Feathers are similar in both development and composition to the scales of living reptiles, at least that is what scientists thought then. (II) Today, feathers are thought to have originated from a tubular structure called a rachis, which can be described as a distal structure or shaft of the feather that bears the web, from which hook like barbs attach together to form a feather. (III) Two types exist in birds and carnivorous dinosaurs. (IV) Some palaeontologists are convinced that the similarities of birds and dinosaurs are close enough to include birds in the group Dinosauria. (V) These are flight feathers- aerodynamically shaped to catch wind drafts for lift and downy feathers- long feathers used to keep the body insulated during cold weather conditions.

A) I B) II C) III D) IV E) V

80. (I) Iron is extracted from ores such as haematite and magnetite by mixing it with carbon and heating it to 1500 degrees Celsius. (II) Getting enough iron is of vital importance to the body. (III) It is essential for the production of the proteins involved in oxygen transport and in the regulation of cell development. (IV) However, an estimated 80% of the world population is iron deficient, according to the World Health Organization, and as many as 30% may have anaemia due to iron deficiency. (V) Nevertheless, it is also important to remember that too much iron intake can be toxic and may result in death.

A) I B) II C) III D) IV E) V
